

HUMIDITY SEPARATORS

Clean Steam Separator S-10 (Stainless steel)

DESCRIPTION

When wet steam is used in sterilization, moisture in suspension reduces the heat transfer's efficiency and validity of the sterilization process can be compromised.

S-10 series centrifugal separators remove moisture from steam pipelines. Steam passing through the separator and as a result of centrifugal forces, impact and swirling effects, separate the particles with a heavier specific gravity, such as water droplets and moisture in suspension.

The condensate collected at the bottom of the separator, must be automatically drained by a suitable steam trap.

MAIN FEATURES

316L stainless steel construction
Several possibilities of installation.
No moving parts.
Self draining design

STANDARD SURFACE FINISH

Internal parts: 0,5 microns Ra *
External : Satin bead blast finish – 1,6 microns Ra
*Welds left as laid
Mechanical polished as option

OPTIONS: Vent connection
Split body design

USE: Steam, compressed air and other gases (Group 2).

AVAILABLE MODELS: S10, S10HV and S10VH

SIZES: DN1/2", 3/4", 1", 1 1/2" and 2"

PIPE CONNECTIONS: Clamp ends or others on request

INSTALLATION: Always with the condensate discharge pointing downwards.

HOW TO SELECT: Generally, in an existing plant it is advisable to fit a separator of the same size of the pipe line. Pressure drop is normally negligible. For approximate pressure drop calculation please consult.
